-----------------	------------------

FEEDBACK

FUNCTIONAL FEEDBACK

No functional feedback.

STYLE FEEDBACK

Feedback One:

While the tests may be simple, some comments would be ideal so that we can easily identify the tests in case we extend the tests.py file.

GENERAL FEEDBACK

Feedback Two:

As I hinted at earlier, are there other tests that we are missing? Just the file seems quite short and only tests that the pages load correctly (ie. HTTP 200). I understand that Django handles other testing, are you planning on including performance tests or are they being handled elsewhere?

RESPONSE

No response required due to no feedback.
