FEEDBACK
DELETE ALL ITALICS – RESIZE BOXES AS NEEDED
FUNCTIONAL FEEDBACK

Use this section to document any issues with the code that you believe effect the functionality of the feature under review.

For example:
Feedback One:
some-app/views.py - line 23-26: Incorrect usage of SOME LIBRARY leads to weird behaviour. If you use the new invocation it should fix it.

STYLE FEEDBACK

Use this section to document any issues with the code that you believe should be changed to improve readability and compliance with coding standards. CRUCIALLY, these should not affect functionality.

For example:
Feedback Two:
some-app/admin.py - line 45: The call of SOME FUNCTION is a bit messy [screenshot of code] I would replace with [whatever code you believe to be better].

GENERAL FEEDBACK

Use this section to document any issues with the code that don't fall into other categories.

For example:
Feedback Three:
some-app/templates/base.html - line 10: Not sure we should be using the Bootstrap CDN, I think we could easily download the bootstrap files to improve performance a bit.

RESPONSE

This section is for the reviewee to complete and is there response to feedback highlighted by the reviewer. Remember you don't necessarily accept changes suggested in reviews if you can lay out your reasoning!

For example:
Response to Feedback One:
Thanks for catching this, I was using the old function call. Adding suggestion to next commit.

Response to Feedback Three:
I see what you mean but I used the CDN just because I don't want to throw unnecessary files into the repo just yet until we're certain on a bootstrap version. (Bit of a weird one ik, but you get my idea)
