CS20/21
Meeting Minutes

21/10/20

I. **Call to order**

Kameron Eralp called to order the regular meeting of the CS20/21 at 16:30 on 21st October on Microsoft Teams.

II. **Roll call**

The following persons were present: Lewis Tse, Paul Traynor, David O'Neill, Kameron Eralp, Pragati Mishra, Dominykas Meistas, Ans Farooq, Torrin McQueen, Tomas Mikus, and Jamie McKay.

III. **Open issues**

a) AWS Credits/ Hayden is going to talk to Tim Storer about this.

b) API Interaction/ Works as detailed in the Lewis' diagram; this diagram covers the scope of the MVP.

c) Does the operator API include business timetables? /No that is all. No need to extend either API. Look up PAS212.

d) The operator project is all that we thought it was. Mrs. Sutherland has been talking to travel services and has more data that could be entered into our database.

e) Will the APIs change while we are working on the project? /They shouldn't but if they do, they will be backwards compatible.

f) Where can we get more technical details about the APIs? /Martin is the Technical Architect for the project and can go into more technical details if we require.

IV. **New business**

a) Creation of User Stories, Personas, and MOSCOW.

b) Next Meeting at 13:00 on Wednesday 28th October.

c) Figure out how to network securely between databases and the APIs. What form of encryption should we use?

      d)   Think about the non-functional requirements, e.g. performance, usability.

V. Adjournment

Kameron Eralp adjourned the meeting at 17:14.
