customers\tests.py                           225    178     21%   22-25, 29-31, 35-38, 54, 67, 72-80, 85-101, 106-130, 135-14
3, 148-152, 157-161, 166-170, 175-191, 196-204, 209-227, 232-236, 241-284, 290-296, 302-308, 314-320, 325-341, 348-362,
367-383, 388-395
customers\urls.py                              9      0    100%
customers\views.py                           338    254     25%   27, 37-47, 57, 67-84, 94-113, 123-141, 151-174, 197-219, 22
9, 239, 249-259, 269-306, 316-356, 366-402, 413, 425-433, 444, 525-551, 558-584, 591-617
manage.py                                     12      2     83%   11-12
-------------------------------------------------------------------------
TOTAL                                        942    438     54%
```

As with the operator query tool, the coverage needed to be improved in the views.py file. So, I set about checking that every template is rendered and that every form is processed correctly.

```
Name                                        Stmts   Miss   Cover   Missing
-------------------------------------------------------------------------
customer_query_tool\settings.py               38      0    100%
customer_query_tool\urls.py                    8      0    100%
customers\admin.py                            24      0    100%
customers\forms.py                            22      0    100%
customers\migrations\0001_initial.py           7      0    100%
customers\migrations\__init__.py               0      0    100%
customers\models.py                          153      0    100%
customers\serializers.py                     106      0    100%
customers\tests.py                           131      0    100%
customers\urls.py                              9      0    100%
customers\views.py                           338    131     61%   73-76, 82, 100-105, 111, 129-133, 139, 168, 215, 257, 285-3
00, 332-350, 382-396, 413, 425-433, 444, 525-551, 558-584, 591-617
manage.py                                     12      2     83%   11-12
-------------------------------------------------------------------------
TOTAL                                        848    133     84%
```

Overall, I believe that 84% is a good level of test coverage.
