CS21 – Open Transport Initiative
Code Review Template

REVIEWER: Ans Farooq	REVIEWEE: David O'Neill
FEATURE: Customer API Purchases Query (Comment overlap with Concessions Query Review)	DATE:16/01/2021

REPO: cs21-main	COMMIT: **430fc797**

FEEDBACK
DELETE ALL ITALICS – RESIZE BOXES AS NEEDED
FUNCTIONAL FEEDBACK

I wasn't sure how to test the filterString query but apart from that I manually tested travel-valid-during-from, travel-valid-during-to, skip and limit which all seem to function correctly.

STYLE FEEDBACK

I believe the code is self-documenting and does not require the use of commentary to understand its function. The naming of the models, serializers and viewsets is consistent and meaningful so you can understand their purpose just by their names.

GENERAL FEEDBACK

No other comments.

RESPONSE

This section is for the reviewee to complete and is there response to feedback highlighted by the reviewer. Remember you don't necessarily accept changes suggested in reviews if you can lay out your reasoning!

For example:
Response to Feedback One:
Thanks for catching this, I was using the old function call. Adding suggestion to next commit.

Response to Feedback Three:
I see what you mean but I used the CDN just because I don't want to throw unnecessary files into the repo just yet until we're certain on a bootstrap version. (Bit of a weird one ik, but you get my idea)
